PROFESSIONAL SUMMARY

Quantitative analyst with a B.S. in Mathematics (Mathematical Finance) and three years building revenue, operational, and financial reporting for transportation and energy enterprises — including marine business intelligence for Phillips 66's Marine group. Completing a full-time **Master of Maritime Business Administration & Logistics** at Texas A&M Galveston in December 2026, with graduate training in port operations, maritime finance, and logistics.

EDUCATION & PROFESSIONAL DEVELOPMENT

Texas A&M University at Galveston — Galveston, TX Jan 2026 – Dec 2026 (expected)
Master of Maritime Business Administration & Logistics

Full-time, accelerated program · Relevant coursework: Port Operations, Administration & Economics · Maritime Financial Management · Maritime Business Analytics & Decision Making · Logistics & Supply Chain Management

University of Houston — Houston, TX 2015 – 2020
B.S. in Mathematics — Option in Mathematical Finance · Minor in Economics

Texas A&M Mays Business School — Online Aug 2026
AI for Business: [Automating Business Storytelling Using AI](#) · [Business Applications of Deep Learning](#)

Stolt-Nielsen — Mentorship Program Participant Since September 2026

PROFESSIONAL EXPERIENCE

Insight Global — Data & Analytics Consultant Oct 2023 – Dec 2024

United Airlines — Corporate Analytics

- **Led the migration of a legacy SQL Server database to Amazon Redshift**, building transformation and validation routines that preserved data integrity through the cutover and improved downstream reporting performance.
- **Expanded the ancillary revenue data model** with commercial stakeholders, adding seat coupon, upsell conversion, and loyalty service metrics that gave the business visibility into revenue streams it could not previously report on.

Slalom Consulting — Data & Analytics Consultant Mar 2022 – Sep 2023

United Airlines — Corporate Analytics

Jan 2023 – Sep 2023

- **Defined passenger check-in and service-exception metrics from raw XML kiosk logs** — bag drop shortcut usage, agent overrides, special service requests — expanding the check-in data model so operations teams could measure self-service performance at airport terminals.
- **Structured Apache Airflow metadata in AWS RDS using SQL** to monitor business-critical pipelines, surfacing failures to the team before they affected operational reporting.

Phillips 66 — Marine Business Intelligence

May 2022 – Sep 2022

- **Replaced a twice-daily manual spreadsheet distribution with a live Power BI accounting summary dashboard**, eliminating a recurring manual reporting cycle and giving Marine business and accounting users continuous visibility into financial position.
- **Converted six Marine Business reports from SAP Crystal Reports to Tableau**, rebuilding report logic and validating output against the legacy system.
- **Trained Marine end users on the new Tableau reporting environment**, leading the transition to self-service access to marine business data.

Smartbridge — Data Engineering Consultant · Client: Rockcliff Energy

Aug 2021 – Mar 2022

- **Reverse-engineered a Python machine learning regression model** predicting well performance and presented findings to senior management.
- **Architected and implemented an Azure cloud environment**, migrating on-premise CSV data stores into Azure Data Lake Storage.

TECHNICAL & ANALYTICAL SKILLS

Analysis & Reporting: Database analysis · Operational, revenue & financial reporting · Trend analysis · Data storytelling

Business Intelligence: Power BI · Tableau · SAP Crystal Reports (migration) · Microsoft Excel

Data, Cloud & Programming: SQL · Python · MATLAB · Machine learning · SQL Server · Amazon Redshift · AWS RDS · Apache Airflow · Azure · ETL

Domain & Business: Marine business intelligence · Port operations · Transportation analytics · Data integrity · Stakeholder engagement

Certifications: PCEP (Python). **Previously certified (expired):** AWS Cloud Practitioner · Power BI Data Analyst · Azure Administrator · Azure Data Engineer
